Note: Because the Lunar Calendar usually begins and ends in early February (based on the Chinese Lunar Calendar), persons born prior to the Lunar New Year are considered to have been born in the previous year. The 2020 Lunar Calendar is from January 25, 2020 to February 11, 2021.

Example: A person born on January 7, 1964 would be born in 1963 according to the Lunar Calendar and come under the star for the earlier year.
